szymon-wilczek.me | *github.com/szymonwilczek* | *Linux Contributions*

PROFILE

Computer Science student with commercial experience and an active Linux Kernel contributor.

EXPERIENCE

11.2025–Present **Linux Kernel**, *Remote*
Analysis and improvement of kernel stability in the area of file systems (ocfs2, f2fs, ntfs3, jfs).
- Identification and patching of vulnerabilities (Use-After-Free, Slab-out-of-bounds) and concurrency bugs.
- Direct upstreaming of code patches to stable branches in collaboration with kernel maintainers (syzbot reports).

10.2025–Present **Software Architect**, *FAMUR*, Zabrze
Developing MES software for the mining sector.
- Digitalization of industrial processes and optimization of data flow management (PHP, SQL).

01.2024–01.2026 **Full-stack Developer**, *Freelance*, Remote
Designing and implementing dedicated web applications.
- Full software development lifecycle: architecture, backend/frontend implementation, and deployment on Linux servers.

EDUCATION

10.2023–Present **Computer Science (B.Sc. Engineering)**, *Silesian University of Technology*, Gliwice
7th semester. Core areas: software engineering, operating system architectures, algorithms.

SKILLS

Programming	C, TypeScript, JavaScript, PHP, SQL
Technologies	Linux, React.js, Git, REST API
Practices	Kernel hardening, memory safety, technical documentation
Languages	English – Advanced, Polish – Native

CERTIFICATIONS

10.2025 **Accessible Technology Design**, *AccessibleEU (European Commission)*
Accessible software design (a11y) and European digital inclusivity standards.

INTERESTS

Open Source, Low-level systems, 3D graphics, and interactive visualizations
